Office Action Summary

Art Unit: 1638

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-36, drawn to transformed plant seeds comprising a seed-specific promoter and bacterial amylopullulanase gene, and methods for their use to produce starch, classified in class 800, subclass 287, for example.
- II. Claims 37-43, drawn to a method to produce sugar, classified in class 435, subclass 100, for example.
- III. Claims 44-47, drawn to a method of producing a polypeptide, classified in class 435, subclass 69.1, for example.

The inventions are distinct, each from the other because:

Inventions I, II and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different functions and different effects.

The invention of Group I involves whole plant regeneration and seed production not required by Group III; and methods of starch production and starch isolation, and alpha-amylase promoters, each not required by any other Group. The invention of Group II involves methods of plant seed or starch treatment with heat or other reagents for the production of sugars, and methods of sugar isolation, each not required by any other group. The invention of Group III involves cultured cells, methods of isolating polypeptides, and a multitude of non-amylopullulanase-encoding sequences, each not required by any other group.

Art Unit: 1638

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, classification, and fields of search, restriction for examination purposes as indicated is proper.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to David T. Fox whose telephone number is (703) 308-0280. The examiner can normally be reached on Monday through Friday from 10:30AM to 7:00PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Amy Nelson, can be reached on (703) 306-3218. The fax phone number for this Group is (703) 872-9306. The after final fax phone number is (703) 872-9307.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Group receptionist whose telephone number is (703) 308-0196.
